## Kids use ANY Savings Account!

Parents and children will never again have to switch financial institutions to continue banking at school when their sponsor is merged or acquired by another bank.

Thanks to SCHOOLSAVINGS.COM'S Universal program option, a child with an account at any financial institution can make deposits at school.

The Universal Program option began 5 years ago and is being adopted by more and more parent organizations that want school banking their way.

This flexibility is especially important when you consider that approximately 30 percent of primary school children already have accounts open

at a preferred institution.

### HOW IT WORKS

1. Parents register their child and his/her account online at SCHOOLSAVINGS.COM.

2. School Volunteers coordinate deposit day as normal and **make one lump sum deposit into a local account.**

3. SCHOOLSAVINGS.COM processes each deposit into the child's individual account—regardless of bank or credit union.

4. Parents praise students while tracking their deposits and setting savings goals online at SCHOOLSAVINGS.COM.

## SCHOOL SAVINGS IS ABSOLUTELY FREE TO SCHOOLS

There is no fee required for your students to bank at school. Instead, parents are asked during registration if they would like to make a contribution to help fund their school's program. Again, a contribution is

NOT required for a child or school to participate.

### FUNDRAISING TOO!

School Savings also delivers fundraising opportunities. In cooperation with your local partners in education, your school may raise funds

through the **Support our School and Receipt Sponsorship** programs. So, become a 'Champion', raise funds for your school and increase your students' financial literacy today! To find out how to 'Champion' your school, go to [Get My School Started](#) or write to [support@schoolsavings.com](mailto:support@schoolsavings.com).
